

ESSENTIAL TOOLS FOR CARD DESIGN, PRODUCTION AND MANAGEMENT

Proven ID software family

The Datacard ID Works software family creates a sensible migration path from fundamental functionality to more advanced program management. For traditional ID programs, Basic software provides everything you need. As your program evolves, you can upgrade to ID Works Standard or Enterprise software and take advantage of new features, SDK support and a wider selection of compatible databases, card printers and input devices.

Datacard® ID Works® Basic identification software includes the core tools that ID programs need to manage card design and production efficiently, as well as excellent flexibility for creating cards and handling images. It also allows you to easily upgrade as your needs change.

- **Powerful ID program management.** This software package enables you to create card and report designs, as well as manage image capture and printing. It introduces basic security features, such as a ghost option for the photo field. You can import and export data from Microsoft® Access databases, encode magnetic stripes and print bar codes. You can also create your own layout, field labels, color and graphics in production forms.
- **Flexible integration.** The application leverages all the features of Datacard® SP Plus Series card printers and integrates seamlessly with many other printer brands. It supports Datacard® Tru™ Photo solutions, as well as TWAIN and Video for Windows image capture devices.
- **Intuitive interface.** The user-friendly interface features point-and-click navigation to simplify card design and production. Customizable sample templates and online documentation quickly turn new users into experts.

Datacard ID Works Identification Software Compatibility Feature Set

	INTRO SOFTWARE	BASIC SOFTWARE	STANDARD SOFTWARE	ENTERPRISE SOFTWARE

- Photo (with border, ghost or transparent background option)
- Date (with time option)
- Bar code (21 types)
- Magnetic stripe
- Static and variable graphic (with ghost and transparent color options)
- Non-printable area
- List
- Composite
- Print count
- Auto sequence

Image management

- In-production image import and export (.BMP, .EPS, .JPG, .PCT, .PCX, .PNG, .PSD, .TGA, .TIF, .WMF)
- Image storage as BLOBs or files
- Multiple images per record
- View photos in table view

Database management

- Auto-create Microsoft® Access 2000 database
- Quick, advanced and stored searches

Database support

- Microsoft Access 2000 and later

Help features

- Online user's guide
- Online help
- Help desk support

Security features

- USB hardware key
- Application- or activity-level user security
- Login timeout feature
- Restrict project access by user
- Secure user audit trail

Compatible with the extensive line of Datacard® card printers

Image capture options

- File input
- Tru Photo solutions
- TWAIN capture devices
- Video for Windows capture devices

System Requirements

Operating system

- Microsoft® Windows® 2000, XP or Windows Vista®

Web browser

- Internet Explorer v6.0 or later

Memory

- 512 MB RAM
- 100 MB hard disk space for application (not including database)

Color

- 16-bit color (65,536 colors)
- (Cameras may require higher color)

Resolution

- 800 × 600 screen resolution
- (1024 × 768 recommended)

Peripherals

- CD-ROM drive
- Available USB port
